

## UTC Pupil Premium Strategy

## Context

The UTC is a relatively new school with a small cohort of KS4 students. We have identified the following main barriers to learning for some of our pupil premium students:

- 1. Some students' attendance is low. Whilst it has improved from their attendance at KS3 in their previous school setting, the UTC recognises that strong outcomes, and securing high quality destinations at post 16 is reliant on good attendance to school. Some students and families need more intensive work to secure high attendance to school.
- 2. The UTC has ambitious targets for all pupils and is determined that all pupils will make good progress, particularly in Maths and English. As the KS4 cohort has a very broad range of ability, UTC leaders have prioritised smaller classes in English and Maths, with a particular focus on PP students.
- 3. UTC recognises that some KS4 pupils have a variety of social and emotional needs which are barriers to securing good progress and have prioritised this area.
- 4. As a UTC, leaders understand the importance of work related learning and careers guidance in ensuring all our young people, particularly those from disadvantaged backgrounds, secure destinations that are ambitious and bring satisfaction and enjoyment.

## Pupil premium strategy 2018-2019
