

## Science at Mulberry UTC

Hello, we are very excited you are coming to study a Science subject at Mulberry UTC. We believe in teaching you skills that ensure you are ready for the world of work, predominantly work within the Healthcare Industry.

Therefore, we'd love you to get a head start before arriving by familiarising yourself with some clinical skills that are essential to know if you want a job in the health field, or just in looking after yourself and family members.

You have seven clinical skills to learn about:

- 1) Click on the link below
- 2) Click on the tab entitled 'demonstration' and watch the video about the skill.
- 3) Click on the tab entitled 'equipment' and see what equipment is needed, do you know what each piece is?
- 4) Click on the tab entitled 'self test' and complete the multiple-choice test.
- 5) Record the percentage you scored, if below 80% open the tab entitled 'quick sheet' and remind yourself of the key facts then try the 'self test' again.
- 6) Record your scores and/or take a screen shot! We'd love to hear which skills you've successfully completed so please keep us posted by emailing [rmcauley@mulberryschoolstrust.org](mailto:rmcauley@mulberryschoolstrust.org) to let us know!

1. Hand Washing <a href="#">Link</a>
2. Taking Blood Pressure <a href="#">Link</a>
3. Blood glucose monitoring <a href="#">Link</a>
4. Communicating with anxious patients <a href="#">Link</a>
5. Temperature measurement <a href="#">Link</a>
6. Use of apron and non-sterile gloves <a href="#">Link</a>
7. Assessment of breathing <a href="#">Link</a>
