

**Principal:** Dr Katharine Vincent

Friday 13<sup>th</sup> November 2020

Dear parent/carer,

Firstly, I would like to send you my good wishes to you and your families. I hope you are all in good health and that you are staying safe during this second lockdown period.

### News about the school

An amazing event was held during half term involving a partnership between the **Mulberry Schools Trust** and **Mercedes-Benz Grand Prix Ltd**.

The Mulberry Schools Trust has just announced an innovative new partnership with **Mercedes-Benz Grand Prix Ltd** and the launch of the **Mulberry STEM Academy** – a Saturday/holiday provision that will provide a place of learning, inspiration and innovation for young people. This will be a powerful supplementary provision for STEM (Science, Technology, Engineering and Maths) education. Working together with **Mercedes-Benz Grand Prix**, it will offer a world-class programme of vocational training, specialised study and masterclasses for students aged 7-18 within the Mulberry family of schools and beyond.

It was truly amazing on Thursday 5<sup>th</sup> November when a group of UTC students had the opportunity to meet Lewis Hamilton and Toto Wolff, along with students from Mulberry School for Girls and Mulberry Academy Shoreditch. Students were able to ask about their lives, what has inspired them and made them successful and to have an opportunity to ask them questions.

Please see attached to this letter a press release about the event in half term and more information about the partnership and the benefits for students.

### Half term school

An extremely successful week of intervention was held for Year 11 and 13 students during the second week of the half term break. Students attended extra study sessions in their GCSE, A-level and technical courses, provided by their teachers. Attendance at these sessions was very good; it is clear that students are keen to catch up academically following the lockdown period last year, and this school will do everything that it can to make that happen.

Further intervention sessions in targeted subjects are being held after school and a programme of after-school and holiday revision sessions will be held during the spring term to support students as they prepare for their exams.

## **Covid-19 safety measures**

We have a full range of measures in place to ensure the safety of your child whilst they are at school. This includes:

- Face-masks must be worn by all students and staff in all circulation spaces at all times.
- Students and staff must remain 2 metres apart from each other and, where this is not possible, they must remain at least 1 metre apart.
- Students and staff are required to regularly wash and sanitise their hands.
- Students are taught with their own zones with separate classrooms, desk, chairs and toilets.

**Please ensure that your child has a face mask with them every day, as these cannot be provided by the school.**

Any students who are exempt from wearing a mask for medical or other reasons should speak to a member of staff so that this can be properly recorded.

### Students who are clinically extremely vulnerable

If your child previously fell into the category of 'clinically extremely vulnerable' during the previous lockdown, you should receive a letter from your doctor about this. Those students who fall into this category are likely to be advised to remain at home for the next four weeks.

### Students with Covid-19 symptoms or close contact with positive cases

You must immediately notify the school if your child has Covid-19 symptoms, if another household member tests positive or if you are notified that your child is a close contact of a positive case. In any of these situations, please do not send your child into school until the end of the relevant quarantine period (usually 14 days).

If your child has a new continuous cough, a high temperature or a loss of taste and/or smell, they must not return to school until they have received a negative test result, even if they are feeling better.

Please go on to our website for up to date advice and guidance from the Department for Education, Public Health England and the school <http://mulberryutc.org/coronavirus-covid-19-information/>.

Many thanks for your continued support during this time.

Yours sincerely,

Dr K Vincent  
**Principal**

Thursday 5 November 2020

### Mulberry Schools Trust launches innovative new STEM provision in partnership with Mercedes-Benz Grand Prix Ltd

- Inspirational programme in science, technology, engineering and maths
- Providing the foundations for a lasting commitment between the two partners
- Virtual launch took place with Lewis Hamilton, Toto Wolff and 150 Mulberry students today

The Mulberry Schools Trust is excited to announce today an innovative new partnership with Mercedes-Benz Grand Prix Ltd and the launch of the Mulberry STEM Academy – a Saturday/holiday provision that will provide a place of learning, inspiration and innovation for young people. It will be a powerful supplementary provision for STEM (science, technology, engineering and maths) education and, working together with Mercedes-Benz Grand Prix Ltd, it will offer a world-class programme of vocational training, specialised study and masterclasses for students aged 7-18 within the Mulberry family of schools and beyond.

To celebrate this significant occasion and to coincide with the partnership launch, Mercedes-Benz Grand Prix Ltd has arranged for Lewis Hamilton and Toto Wolff to join students from Mulberry Academy Shoreditch, Mulberry School for Girls and Mulberry UTC in a broadcast from the team's headquarters in Brackley, Northamptonshire.

The provision will run on Saturdays during term time and school holidays for local young people who have talent, passion and aptitude in STEM, computing, physical science and design. It will offer a comprehensive and integrated curriculum, focusing on the long-term development, strength and needs of each student. Our students are bright, have a passion for STEM fields and will benefit from non-traditional teaching methods, such as industry specific and project-based learning to supplement and enhance the more mainstream teaching they receive in their classrooms and laboratories.

Whilst schools within the Mulberry Schools Trust achieve well and currently have progress well above the national average in many areas, we recognise that our students do not routinely enter degree courses and apprenticeships in STEM compared to other science related pathways. Our schools have worked hard for many years to place our students – most of whom are from Black, Asian and minority ethnic and disadvantaged backgrounds – at the forefront of STEM industries, but the dial has not moved fast enough. Representation from these groups amongst the respective workforce is low in skilled areas and it is particularly complex at the intersection of gender and ethnicity\*. The establishment of this new provision takes explicit, positive action to address this early on in a child's educational life.

Cont/2...

The Mulberry Schools Trust and Mercedes-Benz Grand Prix Ltd are unafraid to go where the challenge is high. Both work within the territory of marginal gains to achieve success in their respective fields. They thrive on team spirit and an enjoyment of high performance – be it in the classroom pedagogy and practice or technical prowess on the race track. With their core values aligned, the partnership provides the foundations on which a deep, long-term commitment can be built. This crucial investment is required if the STEM provision is to change the picture, transform lives and develop a pipeline of talent into the Formula One workforce from amongst the youth of East London.

The provision will give students access to inspirational role models, imaginative teaching and rich extra-curricular experiences over a five-year period. Graduates will leave with a passport into engineering, design and science-based industries and be highly desirable employees for Mercedes-Benz Grand Prix Ltd and other related sectors.

**Toto Wolff, CEO of Mercedes-Benz Grand Prix Ltd commented:** *“We are very proud today to announce our new partnership with the Mulberry Schools Trust and to continue our journey towards making a positive contribution to the future engineers and scientists of the next generation. This is a deeply important project for us and the result of a great deal of thought into how best we might make a lasting contribution to promoting diversity and inclusion within our industry. I know myself and all our team are passionate about the success of this programme and we look forward to welcoming the first attendees of the Mulberry STEM Academy and exploring how we can best support their learning journey. Providing practical workplace experience and access to opportunities will be key to breaking down the barriers these students face when aspiring to their future careers and we are proud to be part of a project which will set them on a path to strengthening the STEM capabilities of our industry in years to come. The Mulberry Schools Trust is a hugely impressive organisation that shares our core values and we are honoured to be working with them. If the passion, enthusiasm, respect and excellence that I witnessed today during our virtual event with students from the Mulberry Schools today is anything to go by, this is going to be a very exciting, rewarding and successful venture.”*

**Lewis Hamilton continued:** *“I was honoured to join the virtual event today to launch the new STEM Academy and to see the enthusiasm, intelligence and commitment of the Mulberry students for myself. It’s so important that, as a sport, we do all that we can to ensure we are as inclusive as possible. Increasing young people’s access to STEM and, ultimately, paving the way to careers in our industry is a brilliant way to do this. Creating a sport that is more representative of society is something very personal and important to me, and this partnership shows a real commitment from Mercedes to build a legacy that goes beyond motorsport. The STEM Academy is a fantastic opportunity to make a difference and I’m proud to work alongside my team, in partnership with the Mulberry Schools Trust, to open doors for these students which might otherwise have been closed, and to give them the opportunity to excel. Providing young people from diverse and often disadvantaged backgrounds with the confidence and resources to implement change in their own lives is one of the strongest tools that we have to build a fairer and more equal future. I’m looking forward to seeing how the students progress and, judging by the questions I received today, I have every faith we will see some of them fulfilling their dreams of working in motorsport in the future!”*

**Jane Farrell, Chair of the Mulberry Schools Trust said:** *“We are delighted that Mercedes-Benz Grand Prix Ltd is partnering with us on this exciting new venture. This partnership will provide access to world class innovation and performance that match the ambitions of our students and the communities that they live in. It’s our job to ensure that we create opportunities that encourage the development of the skills and confidence that will lead to fantastic employment opportunities in specialised industries that too often miss out on the talents of our truly diverse and brilliant students. I would like to thank Mercedes-Benz Grand Prix for seeing their potential and creating a true partnership of learning and opportunity.”*

Cont/3...

**Dr Vanessa Ogden, CEO of the Mulberry Schools Trust and Headteacher of Mulberry School for Girls continued:** *“The first-class learning experiences our students will receive through this deeply thoughtful partnership between Mercedes-Benz Grand Prix Ltd and the Trust will deliver a pipeline of talent into science and engineering industries over the next few years. Equality, diversity and inclusion are at the heart of our work and we do all we can to provide young people in our schools with the opportunities they deserve at university and in industry. We must move the dial much quicker than we have in the UK to meet our students’ aspirations and fulfil their potential. Mercedes-Benz Grand Prix recognises this and I am glad to work with such like-minded partners as Lewis Hamilton, Toto Wolff and all their colleagues in our efforts to really shift structural inequality for good, starting early in young people’s lives through education and workplace experience.”*

**Paul Mills, Chief People Officer at Mercedes-Benz Grand Prix Ltd concluded:** *“It has been a pleasure working closely with the leaders and teachers at the Mulberry Schools Trust over the past few months as we have established our new STEM Academy. I would particularly like to extend my thanks and appreciation to Jane Farrell and Dr Vanessa Ogden for their vision and commitment to our joint endeavour. I have already taken learnings from them which will be of benefit to our team, and I am confident that this learning will go both ways in the future. Unfortunately, we have not been able to visit the Mulberry Schools as yet due to Covid-19 restrictions, but we very much look forward to being able to do so and meeting the students in person. I am honoured and excited to be joining the steering group for our STEM Academy programme and look forward to working with the Trust and our employees at Mercedes-Benz Grand Prix to make a real difference to the Mulberry students over the course of our long-term commitment.”*

\* Engineering UK 2018: 9% are of Black, Asian and minority ethnic background; 12% are women; 24% are of low socio-economic background

- Ends -

## NOTES TO EDITORS

### About the Mulberry Schools Trust

The Mulberry Schools Trust is a flourishing multi-academy trust set up in 2016 in Tower Hamlets. The family of schools includes Mulberry Academy Shoreditch, Mulberry School for Girls and Mulberry UTC, and it is currently working with the Local Authority and the Department for Education to build a new school in Wapping – Mulberry Academy London Dock. The Trust believes in the power of local partnerships with families, other schools and the communities that it serves.

Mulberry Academy Shoreditch and Mulberry School for Girls are graded ‘Outstanding’ by Ofsted and Mulberry UTC, a relatively new school, was graded ‘Good’ by Ofsted earlier this year. Attainment and progress of schools within the Mulberry Schools Trust is significantly above the national average at GCSE and A Level.

Cont/4...

The Trust takes great pride in its extensive network of partners, covering all key areas: education, business, community and culture including the University of Cambridge, the Prince's Trust, Barts Health NHS Trust, Bank of America Merrill Lynch, the British Film Institute, the National Theatre and the WOW Foundation. Each of its partnerships contribute to and enrich the curriculum offer for students and form an integral part of the Trust's unique and inspiring learning environment. These strong collaborative partnerships provide students with exceptional opportunities which support and enhance their learning including practical activities, trips, motivational speakers, school visits and mentoring.

Above all, the Trust's partnership activities broaden students' horizons and takes their learning beyond the classroom.
