Steps of Re-opening Preparation:

Introduction

This document has been developed using guidance from various LA, including Tower Hamlets, DFE guidance, CST guidance and joint union representation. It starts by considering SAGE modelling. The hierarchy of controls we are asked to factor into our planning to help prevent the spread of COVID-19 are set out below.

- Controlling the transmission of the disease: minimising contact with children and adults who are unwell by ensuring that those who have coronavirus symptoms, or who have someone in their household who does, do not attend school.
- Management and control through personal hygiene: cleaning hands more often than usual wash hands thoroughly for 20 seconds with running water and soap and dry them thoroughly or use alcohol hand rub or sanitiser ensuring that all parts of the hands are covered.
- Ensuring good respiratory hygiene: promoting the 'catch it, bin it, kill it' approach
- Enhanced cleaning regimes: cleaning frequently touched surfaces often using standard products, such as detergents and bleach.
- Minimising contact and mixing: altering, as much as possible, the environment (such as classroom layout) and timetables (such as staggered break times).

Make clear that in any emergency staff do not need to stay 2 metres apart, e.g. terrorist attack, fire or explosion and large numbers may need to move fast to evacuate.	Current evacuation routes could cause multiple groups of people to come into contact. However, the schools have limited numbers of pupils on site at any one time.
